No time to learn a language? Juggling work, training, fitness, family, friends and other hobbies? Take the stress out of learning languages with a personalized and adaptive learning plan that fits into your life. Set your goals and schedule Generate a plan based on your availability Work to an expected completion date, in small, achievable steps Learning a language has never been easier. Can you believe this smart app can help you speak a free language? Unlike the other training app, Busuu builds his place as the most trusted language teacher for foreigners. Coming from Busuu Online S. L., Bussu's original platform is a social network that connects people with the same language interest, and trains them. The social network app version then debuts on such platforms as Android and iOS. Since then, it has been reported that almost a hundred million users have signed up in the hope of improving their second or third language. Effective courses People come to Bussou to learn new languages. But not all of them know what they need to do to improve their knowledge effectively. Thanks to the detailed survey questions that this app offers, the user can come right to the bottom of their problem. Start by defining the main goal when learning the selected language, the user must choose the level they want to achieve. Additionally, the application allows the user to set the time table for their learning progress, including days and periods. Once the user is able to answer the questions in the survey, they can see the data table that suggests their custom research plan. There is usually no app that offers the user to learn more than one content, but Busuu is different. There are twelve languages to practice the user, from the most popular ones such as English, Spanish, to the least used. In addition to this, this application offers multilingual packages for the user to choose, and each package of language contains several tutorials. Each lesson in Busuu contains four key elements that are vocabulary, memorization, dialogue and conversations. The user can swipe through the cards in a tutorial to learn new words and phrases. As he has done by introducing new content into his mind, he can strengthen them by performing various exercises, such as filling gaps or answering quizzes. Dialogues are the best parts they practice as they allow the user to read and listen to words in context. Last but not least, the conversation department enables the user to work with native speakers. In detail, the user will need to complete an exercise by writing speakers will then adjust their work. As the user completes all four parts of the report on how much the user has achieved. Learning with Busuu is incredibly effective because this app knows what every user needs, as everyone has their own interest. For example, a learner whose goal is to learn about entertainment and culture will have the opportunity to approach lessons, including cultural elements. If the user wants to achieve the upper intermediate level, he will face more challenging lessons and exercises. The application requires the user to study at least ten minutes a day, and ten minutes is enough to deliver the best knowledge he can. Want another language learning app? Try Lingodeer Premium! Connecting people Busuu encourages its users to make friends by helping others and adjusting conversation exercises. This action brings out more positive results than it seems. Because one user submits their practice (written or audio recording) to the system, other users will find it through the detection function in the Social tab and give them a correction. However, it does not look like the user should help others with the language he is learning. Busuu allows him to be an expert in the language he uses in the application. For example, if you get an explanation for Japanese words in English, then you can help people who are learning English. You can ask people to adjust your practice, and other people can do the same for you. How exciting! The user can also invite their friends to spread the joys in the languages of others. Busuu connects to the two most popular social networks, such as Facebook and Google Plus. In addition, the user can share an invitation via a link to attract the attention of their friends. Mechanics, and more Busu provides a convenient interface, with blue and white, which are the main colors of this application. In addition to this, the sensitivity of any touch in the middle of the app is no joke. The user can firmly switch between tabs and perform the desired tasks in seconds. There are not many things to talk about the sounds of this app as we don't expect too many sound effects from an education app. However, the user still has the opportunity to ease his learning progress with a magical ticking sound that wakes up his senses when he gets bored. Never manage to bring the user from one excitement to another, this is how Busuu does! In conclusion if you want to have fun, go play video games. If you want to learn, find a book guide. If you want to have fun while studying, choose Busuu. Just try it! Have a nice day! We all know that language is a tool that helps people share their thoughts, ideas, feelings, and abilities of others. So, on this day everyone has to learn some other languages. However, where to learn is convenient, fast, but brings high efficiency? is a common problem for many people and they have found a good solution, which is BUSUU: Learn languages. Busuu is an application for learning English, language, Busuu Limited is one of the best English applications used by many people. This app designs short, short, aggregated lessons on the most basic things to create good conditions for everyone to learn English and other many languages. Moreover, it is also a large community of language learners. You can exchange and get help from everyone. Busuu was therefore given a good rating as it brought efficiency and reached 4.3/5 quality points with 270,000 reviews. What is Busu? Busuu is a great application for learning English. It offers many solutions and processes to help learners, including native learning, offline learning, grammar lessons, vocabulary and accent training, providing training in fish plans and qualifications certified by McGraw-Hill Education. You will also be able to check the entry level. The system will rely on your results to offer appropriate tutorials. It's hard to find these useful features elsewhere. Learning a language in Busuu is really effective? With each grammar lesson you will practice and practice in many forms respectively: connecting words, choosing the right answers, adjudicating samples, answering questions and filling in the blanks. The structure of these exercises is tailored to your level and there are specific instructions to help you complete the exercises more easily. And if you are someone who is not good at memorization, you can use the personal planning feature in Busuu, or play memorable games, it will give you a lot of useful tips. In general, your articles will be checked for errors by the system and explain to you about these wines in detail. As for the conversation, you will record it and present it. The locals will fix you. Taking courses at Busuu, you only need to spend 10 minutes each day learning new lessons, reviewing the content I learned and communicating with people from other countries. With the motto learning always goes hand in hand with practice, you will notice your progress in a short time. In addition, lessons and exercises are designed to be quite short, supporting users to try offline so you can learn at any time. Buy some coffee? You're waiting for a friend? Even on the way to work.
